

Button System Mockups

Ten production-ready button styles for the Executive Angler dashboard, drawing from Strava's no-nonsense action language and Salesforce Lightning's hierarchy-first system. Each style is rendered at three sizes with branded colors, typography, and hover states. Pick one (or a pair) as the canonical system; the rest become reference for edge cases.

05	Pill Soft Tint	p. 4	10	Split / Segmented	p. 6

01 Strava Solid Primary

CTA · HERO

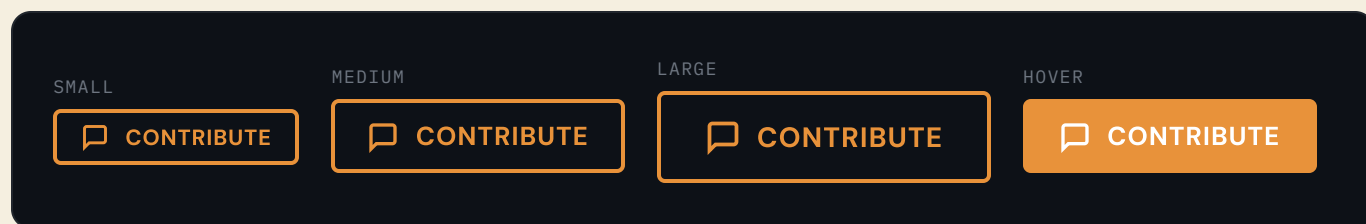

Heavy, uppercase, all-caps copper slab. Strava's signature "DO THE THING" button. Use sparingly — one per view, reserved for the single most important action ("LOG SESSION", "TIE NEW FLY", "VIEW JOURNAL").

02 Strava Outline / Ghost

SECONDARY · TOOLBAR

Same energy as 01 but for secondary actions sitting next to a primary CTA. Fills with copper on hover. Pair with the solid for action rows (e.g., "LOG SESSION" + "ADD FLY").

03 Salesforce Lightning Brand

ADMIN · FORMS · CMS

Refined, professional, soft gradient — Salesforce's go-to "primary action" pattern. Mixed case, modest weight, comfortable density. Best for the admin CMS, settings, and any place we want "considered" rather than "shouting."

SMALL · 30PX

MEDIUM · 36PX

LARGE · 44PX

04 Salesforce Neutral

CANCEL · SECONDARY FORM ACTION

The companion to 03 — white surface, gray border, dark text. Used for "Cancel," "Back," or any reversible secondary action in forms. Quiet by design.

MEDIUM

LARGE

PAIRED

05

Pill Soft Tint

FILTER CHIP · QUICK ACTION · INLINE

Modern SaaS "chip" CTA: copper-tinted background, copper text, fully rounded. Friendlier than a slab. Use for filter toggles, "Tie Next," "Mark Caught," and inline content actions. Two backgrounds shown — works in both light and dark mode.

06

Icon Tile

DASHBOARD QUICK-LAUNCH ROW

Linear / Notion-style nav tile: icon top-left, label, optional sub-label, optional count badge in the corner. **This is the recommended upgrade to the small icon row at the bottom of your dashboard** — same density, but legible and tap-friendly.

RECOMMENDED REPLACEMENT FOR THE 36×36 ICON-ONLY ROW IN COMPACTSTATSROW.TSX

07 Compact Stat Pill

DASHBOARD STATS ROW • LINKIFIED DATA

For the "321 fish · 75 sessions" row at the bottom of your dashboard. Each stat becomes a tappable pill that deep-links to its detail view. Mono-spaced numbers, copper accents on the values. **Direct upgrade to today's CompactStatsRow text.**

DEFAULT

LARGE

DROP-IN REPLACEMENT FOR THE INLINE TEXT STATS — READABLE + TAPPABLE

08 Glass / Frosted

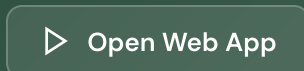

HERO • PHOTO OVERLAYS • MAP CONTROLS

Backdrop-blurred translucent surface — for CTAs that float over photography (river hero images, fish photos, map views). Stays readable on any background.

SMALL

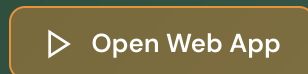

MEDIUM

LARGE

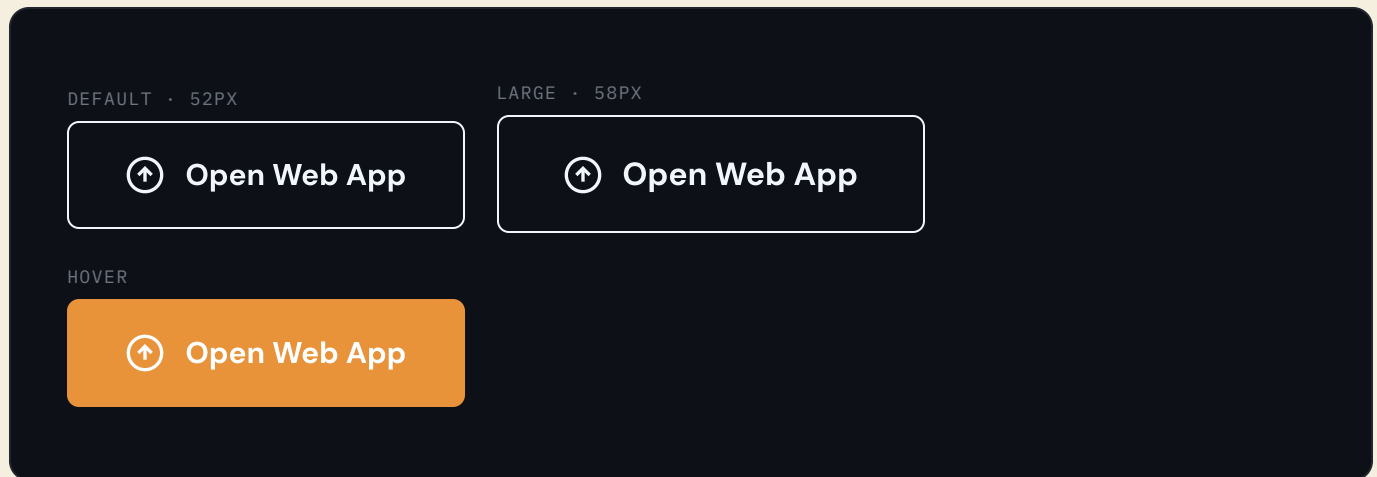

HOVER

09 Hero Outline Heavy

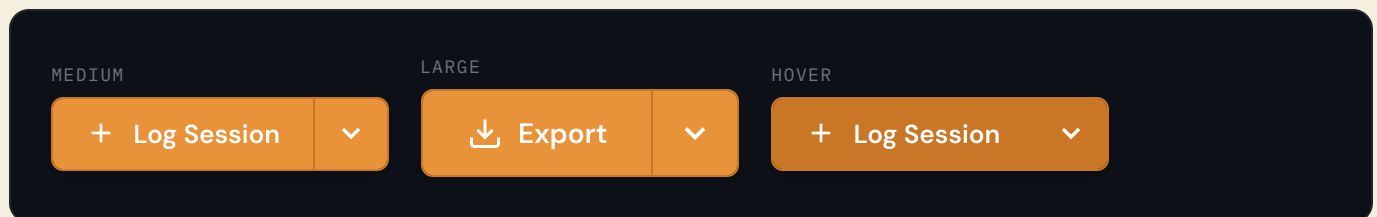

LANDING PAGE · MARKETING

Large, generous padding, hairline border. Pairs with a solid copper CTA on the landing page — "Download for iPhone" (solid) + "Open Web App" (this style). Hover fills with copper for unmistakable affordance.

**10 Split / Segmented**

PRIMARY + ALTERNATE ACTIONS

A primary action joined to a dropdown caret for related variants. Use for "Log Session ▾" (with options: Quick Log · Detailed · From iOS) or "Export ▾" (CSV · JSON · PDF). Powerful when you have one obvious action plus 2–3 less-common variants.

**RECOMMENDATION**

For your dashboard specifically, I'd ship **#01 Strava Solid** as the "My Journal" primary, **#02 Strava Outline** for "Contribute" and "Ideas," **#06 Icon Tile** in place of the cramped 36×36 icon row, and **#07 Compact Stat Pill** to replace the inline text stats. That's a coherent four-piece system covering every action surface on the page. The other six stay in the library for forms (03/04), filters (05), photo overlays (08), landing (09), and multi-variant actions (10).
